NAVY MARINE CORPS INTRANET

Available Classified CLIN’s

CLIN 0001AF Fixed Workstation
Classified
Thin Client

NMCI
NAVY MARINE CORPS INTRANET

- Thin Client" - CLIN 001AD (Wyse Terminal).
- Microsoft Windows Embedded XP.
- Citrix MetaFrame for connectivity.
- Provides NMCI services:
  - Reflection (TN3270, 3270, VT100)
  - NMCI Active Directory Driven
  - Standard Office Automation Software

- WinIATS is provided from a PSA Citrix server.
- TN3270 Emulation provided from a PSA Citrix server.
- Classful – Embedded XP resides on flash
- Stateless – No hard drive, USB, floppy to store data, can be installed in a RAA
- Limited CLIN 23 peripherals allowed for order

- **Recommended for:**
  - Users who desire a "low-budget" classified seat.
  - Users in RAA's who cannot maintain 24x7 positive control of devices.

Price: $369.90 per mo

Must be ordered with a minimum of 30 seats in a secure enclave.

Room Security Constraints

•RAA / CAA / OSS

•Unless under positive control at all times DAA approval for use in RAA is required

Status: Orderable

CLIN 0006AC Classified Wall Plug - Service Only

NMCI
NAVY MARINE CORPS INTRANET

Price: $34.39 per mo

- Provides additional classified connectivity to NMCI through existing NMCI wall plug
- Can not be used to attach additional networks, servers, sensors, devices with high bandwidth requirements
- Cannot provide service into a room not approved for classified processing
- DAA approval is required for all attached items

- **Recommended for:**
  - Connectivity expansion in a CAA
  - Classified visitor workspace

Room Security Constraints:

•RAA / CAA / OSS

•ISP in an RAA must be enclosed in PDS and the plug secured in a lockable but viewable lockbox

Status: Orderable

CLIN 0006AE Classified Wall Plug - Inside a Controlled Access Area

NMCI
NAVY MARINE CORPS INTRANET

Price: $775.00

- Provides an additional wall plug beyond those provided with all classified NMCI seats
- Service is restricted to locations where a NMCI managed classified switch and a TACLANE are already provided
- Can not be used to attach additional networks, servers, sensors, devices with high bandwidth requirements
- **Combines with a 0006AC:**
  - 0006AE: one time charge as ISP is run in a classified room
  - 0006AC: Classified connectivity is added to an existing NMCI owned wall plug
- **Recommended for:**
  - Additional plugs for classified connectivity for a room that has a Taclane and additional ports on a NMCI managed switch

Room Security Constraints:

•RAA / CAA / OSS

•ISP in an RAA must be enclosed in PDS and the plug secured in a lockable but viewable lockbox

Status: Orderable

CLIN 0006AF Classified Wall Plug - Outside a Controlled Access Area

NMCI
NAVY MARINE CORPS INTRANET

Price: $2,400.00

- Provides an additional wall plug beyond those provided with all classified NMCI seats
- Service is restricted to locations where a NMCI managed classified switch and a TACLANE are already provided but which requires a PDS
- Can not be used to attach additional networks, servers, sensors, devices with high bandwidth requirements
- Requires Protected Distribution System (PDS)
- **Combines with a 0006AC:**
  - 0006AF: one time charge as ISP is run in a classified room
  - 0006AC: Classified connectivity is added to an existing NMCI owned wall plug
- **Recommended for:**
  - Conference rooms

Room Security Constraints:

•RAA / CAA / OSS

•ISP in an RAA must be enclosed in PDS and the plug secured in a lockable but viewable lockbox

Status: Orderable

- Currently certified only on Windows NT 4.0

Status: Not Orderable for Classified Workstations

Classified Ultra Thin Client (Pending CLIN part number)

NMCI
NAVY MARINE CORPS INTRANET

Price: undetermined

- Cryptek secure ultra-thin client (SUTC) device
- All applications run from servers. Applications are not installed on the local device. No local storage by design.
- The SUTC connects with a Trusted Solaris Server only.
- SUTC device and infrastructure provides access to the WinIATS application.
- NMCI Applications are accessed via the SUTC-delivered web browser and CLIN 0038AC infrastructure. These applications are identical to "1AD", but displayed on a SUTC device:
- **Recommended for:**
  - Legacy UNIX applications (GCCS)

Room Security Constraints

•RAA / CAA / OSS

•No classified image on workstation, if approved may not have to be stored in a secure safe when used in an RAA when not under positive control

Status: In Pilot Testing / Customer Required to Deliver Official Requirements Documentation

Fixed Workstation ***Classified*** Ultra Thin Client
pg. 2

- Currently in Pilot stage, awaiting further developments
- Anticipated completion of Pilot: May / June 2004
- Statement of Objectives from the customer required
- Version 1.0 anticipated bandwidth between 300/400 kb per user. Not acceptable for WAN transport.
  - Version 2.0 of the UTC is being tested currently. Bandwidth constraints are being analyzed but anticipated to be 100k per user

IPS Container (Pending CLIN part number)

NMCI
NAVY MARINE CORPS INTRANET

Price: undetermined

- Secure safe for enclosing active NMCI transmission medium.
- GSA and NSA approved for use in secure rooms.
- Allows origination and termination of PDS.
- “SCIF in a box”
- **Recommended for:**
  - RAA’s
  - Secure storage of classified devices
  - Termination of PDS

Status: Pending CLIN number

Classified VTC (Pending CLIN part number)

NMCI
NAVY MARINE CORPS INTRANET

Price: undetermined

- Incorporating the current DoN Tandberg Classified VTC solution into NMCI is currently in development.
- Customer needs to provide requirements documentation (bandwidth, number of devices, management features, future requirements) prior to development of service
- NMCI level of service still in debate at this time (JWICS, point-to-point, point-to-multipoint, CLIN 32 government managed device).
- **Recommended for:**
  - Commands who require a reduction in the TDY budget

Status: Customer Required to Deliver Official Requirements Documentation
